

as a logged-in user, I can access current travel itinerary and view bookmarked activities

Reference to user story 2 for user logging in. Reference to user story 4 for creating itinerary. Reference to user story 5 for bookmarking any activities. User can view an itinerary in the profile and show bookmarked activities on the list. If it goes right, it will display the bookmarked activities and user can click on them for details. If it goes wrong, no bookmarked activities are shown.
