

**as a logged-in user, I can create a new itinerary in my profile and view past itineraries**

Reference to user story 2 for user logging in. User can add a new itinerary for particular location and dates to existing list of itineraries and simultaneously view both new and past itineraries. If it goes right, user receives message “successfully created” and can see the new itinerary in the profile and view old ones. If it goes wrong, error message “itinerary not successfully created, please try again” pops up and the new itinerary does not show in profile and no old itineraries displayed.
