

**as a logged-in user, I want to see the homepage display travel suggestions based on past itineraries**

Reference to user story 2 for user logging in. User can view travel recommendations on the home page based on past saved trips and Facebook geotag data. If it goes right, user sees a list of locations and can choose the ones they are interested to view more information and activities. If it goes wrong, user sees no travel suggestions on homepage and is displayed the default homepage.
