

**as a logged-in user, I can bookmark/save interested activities into itinerary**

Reference to user story 2 for user logging in. Reference to user story 1 for receiving a list of activities. Reference to user story 4 for saving to an existent itinerary. User can pick an activity and choose to bookmark it as part of an itinerary. If it goes right, users receives message “activity successfully bookmarked” and can see the new saved activity in the itinerary. If it goes wrong, nothing is saved in itinerary and error message “activity not saved, please try again.”
